THE NATURAL RESULT. Those who Clamored for the Interstate

Law Cry "Enough." WASHINGTON, April 5th .- Without doubt strong effort will be made in the next Congress to either repeal or at least modify ions. Already the Commission is over-whelmed with communications asking for an interpretation of certain phrases in the law, the writers being desirous of knowing f the same will not bear this or that construction as will suit their own conveni ence. The folly of trying to make ironclad already apparent, and yet the law does not go into effect until to-morrow. An American Consul Proceeds to Break Up an Infamous Custom. Lewis publicly gave his agent on the expedition the Amer ican flag for protection, and a document demanding the immediate liberation of every prisoner confined for debts due either American citizens or proteges of the Consulates. This action undoubtedly as sisted in the complete destruction of the infamous system which has grown up in Morocco, whereby usurers having by various means, corrupt and otherwise, secured the protection of different foreign Consuls, succeeded in reaping fortunes by driving hard bargains with the natives, and then, by virtue of official standing or influence, collecting the last penny by the nost rigorous methods.

THE TRIUMPH IN CHICAGO.

VOTE FOR AMENDMENT NUMBER THREE.

Mr. Fiske well says: "The first require ment, for the solution of the problem of municipal government, is the absolute and complete restoration to the people of the right to control their own local affairs." This is so clearly true that we can conceive prohibitionists. Think of it, here are two of no answer to be made to it. It follows antagonists, hating each other with un that Amendment Number Three to be questioned sincerity, locking arms and adopted. A single shrewd political "boss" in one day in the legislative lobby, can undo all the work of town improvement societies, and negative all efforts by the public spirited to advance local interests and conserve local economy. More than this. So long as Legislatures create city charters we will have a variety of independent Boards and a divided policy concerning administration of municipal affairs. The cities of California are so widely separated, so different in climate, and so diverse are the views of their people concerning the right policy of ultimo regarding competition of convict local government and their needs, that it with free labor, especially in the furniture is simply impossible to adapt any general law to the wants of all. All that remains, therefore, is to do as is proposed by Amendment No. 3—confer upon the people of every city the right to construct their own organic law, subject to approval by the Legislature but not to amendment by it. WHAT IS CATARRH?

[From the Mail (Can.), Dec. 15th.]

CATARRH IS A MUCO-PURULENT DISopment of a vegetable parasite in the internal ning membrane of the nose. This parasite is only developed under favorable circumstances and these are: Morbid state of the blood, as the blighted corpuscle of tubercie, the germ oison of mercury, toxomæa, from the retention of the effete matter of the skin, suppressed per piration, badly ventilated sleeping apartmen and other poisons that are germinated in the blood. These poisons keep the internal lining membrane of the nose in a constant state of i ritation, ever ready for the deposit of the seeds of these germs, which spread up the nostrils and down the fauces, or back of the throat, ausing ulceration of the throat; up the eu stachian tubes, causing deafness; burrowing in he vocal cords, causing hoarseness; usurping he proper structure of the bronchial tubes, endng in pulmonary consumption and death. Many attempts have been made to cure this listressing disease by the use of inhalents

distressing disease by the use of inhalents, medicated vap'rs and other ingenious devices, but none of these treatments can do a particle of good until the parasites are either destroyed or removed from the mucus tissue.

Some time since a well-known physician of forty years' standing, after much experimenting, succeeded in discovering the necessary combination of ingredients which never fail in absolutely and permanently eradicating this horrible disease, whether standing for one year or forty years. Those who may be suffering from the above disease should, without delay, communicate with MR. DIXON, SR. of the nmunicate with MR. DIXON, SR., of the nof A. H. Liver Complaint

Is more surely and speedily cured by the use of Ayer's Sarsaparilla, than by any other remedy. ** I was a great sufferer from liver troubles, and never found anything that gave me permanent relief until I began taking Ayer's Sarsaparilla, about two years ago. A few bottles of this medicine produced a radical cure. - Wm. E. Baker, 155 W. Brookline st., Boston, Mass.

A Remarkable Cure.

Ayer's Sarsaparilla has cured me of 2s bad a case of Abseess of the Liver as any human being could be afflicted with and live. I was confined to the house for two ars, and, for the last three months of that time, was unable to leave my bed. Four physicians treated me without giving relief, and, in fact, nothing helped me, until I tried Ayer's Sarsaparilla. After using a quarter of a bottle of this medi-cine I began to feel better, and every additional dose seemed to bring new health and strength. I used three bottles, and am now able to attend to my business. I walk to town—one mile distant—and return, without difficulty. Ayer's Sarsaparilla has accomplished all this for me.

SARSFIELD'S CHRONIC ULCER SALVE!

The people of the Interior will remember that a few years ago, J. P. SARSFIELD, of Sacramento, became fortunately possessed of certain valuable remedial agents. With these he effected in Sacramento and Central California remarkable cures, and drew the approving attention of many physicians. So wide-spread became the fame of his remedies, that business men were convinced of their entire reliability, and of the truth of the marvels they accomplished. The result has been the formation of a Company to aid him in putting these needs for suffering humanity broadly upon sale. The Company has its Depot at No. 115 EDDY STREET, SAN FRANCISCO, but the medicines can be had of all reputable

THEIR CONDITION IN MOST SEC-TIONS OF THE STATE.

All Right up to this Time, but Rain Needed this Month-Fruit Abundant,

Below we present a summary of crop reports received last night from most of the grain-producing sections of the State. These reports show that wheat and State. These reports received last night from most State. These reports show that wheat and State Received R barley have not as yet suffered from drought, but that rain will be required within the next two weeks to insure an average yield.

The fruit crop was never more promising:

SACRAMENTO.—In this county the present prospect is excellent. The acreage of both wheat and barley is fully up to the usual sowing, and the standing grain has good color and growth. There is as yet no need of rain, and if a supply comes in two or three weeks, which will undoubtedly be the case, the yield of wheat and barley in this county will be very large.

SAN LUIS OBISPO.—Reports from over the county are favorable regarding the crops of barley have not as yet suffered from drought, \$2 25@ SAN Luis Obispo.—Reports from over the county are favorable regarding the crops of wheat and barley. Especially the early sown look well. With rain by the middle of the month the harvest will be good. Otherwise crops will be light.

MERCED.-Wheat and barley crops here are MERCED.—Wheat and Darrey cops here are suffering seriously for want of moisture. Sum-mer-failow wheat looks green and thrifty, though all admit that rain is needed badly now. Exceedingly small returns will result without two or three inches of rain in April. Chico.—Crops in the section about never looked better. A long dry speil has not affected the growth as yet. The wind has been south for two days, and there is moisture and coolness with it. Both barley and wheat crop promise to be large.

SAN DIEGO.-The usual acreage has not this san Dieso.—The usual acreage has not this ear been sown in barley or wheat, owing to the steness of the first rains. In the interior, where he rainfall is greatest, the prospects for crops re fairly good. In the drier bett next the coast rain crops will be comparatively a failure, nless spring rains soon come to the rescue. grain crops will be comparatively a failure, tunless spring rains soon come to the rescue.

Salinas.—The outlook for abundant crops in Monterey county was never better. Although we have had no rain for some time, the fact would never be realized from the appearance of the green fields by which we are surrounded. Harmers are confident of a large yield.

Bakersfield.—The wheat and barley crops in this portion of Kern are looking well. Except to a very limited extent they are growing on irrigated lands, and, of course, the yield will reach the maximum quantity to the acre.

Antioch.—Here, as elsewhere in Contra/Costa, rain is required, yet grain on fallowed land is presented by the service of the service

GILROY.—The stand of wheat and barley in this portion of Santa Clara is very fine, needing only a little rain this month to insure very full crops. Fruit never before looked so promising.

WOOL—During the week just passed, while rates on wool to Boston were \$62\frac{1}{2}\$c, all good lots arriving were quickly taken by the shippers on Saturday morning, when the wool-packers could no lorger pack with assurance of having their wool received on board by the railroad people, there was not a bag of tusoid spring elip of new growth on hand. The new rates (\$3.70 to Boston on wool) having gone into effect, there will be a pause in wool matters because shippers will be slow to do railroad business on the new basis. It is not to be expected, therefore, that much, if any, activity will prevail for the next lew days. Wool men, as a rule, believe that the rates named cannot last, as there are too many other outlets for shipment. The railroad people know that such outlets exist and they are not likely to allow so large a trade as the wool trade to \$10 out of their hands.
